Enterprise Solutions

ITS develops and implements Enterprise Solutions, including Digital Transformation and Business Automation, for a wide range of clients including those in Banking and Finance, Oil and Gas, and the Government.

ITS Enterprise Solutions are based on the ITS 'Frigate' integrated framework, a transparent transformation solution that includes a Document Management System, Business Process Management Solution, Business Rules Management System, Mobile Apps, Geographical Information System, Portal Solution, Online Payment Solution, Robotic Process Automation (RPA) solution and E-Services Solutions.

Paperless Enterprise Solution

ITS Correspondence Management System organizes archives, manages, routs, and follows-up on inbound, outbound and internal correspondences, effectively reducing paper and automating workflows for a more effcient organization. CMS-NG elevates customer experiences, through an easy to use platform that can be accessed via a special mobile app, and transforms daily operations by enhancing productivity and collaboration, minimizing information duplication and controlling.

Business Process Management

Business Process Management (BPM) software provides numerous capabilities in a single integrated workflow solution, offering a disciplined approach to the identification, design, execution, documentation, measurement, monitoring and control of both automated and non-automated business processes.

Geographical Information System

Geographical Information systems for Enterprise, seamlessly Integrated with Business Automation Solutions with advanced analytics visualization and extended Augment Reality capabilities, for geo enabled Utility and enterprise Services.

Robotic Process Automation

Robotic Process Automation (RPA) automates repetitive tasks to support cost efficiency, reduce human error, and allow employees to focus on higher-value initiatives that drive innovation and strategic success.

Intelligent Document Capture

Intelligent Document Capture uses natural language processing, text analytics and machine learning technologies to capture, recognize, extract information and classify business documents.

Enterprise Resource Planning

Enterprise Resource Planning (ERP) software solutions improve business operations and customer response times. ITS ERP Consultants bring expertise across functions including Financials, Human Resource Management, Supply Chain Management and Procurement, and will apply an ERP solution that meets your specific business requirements.

Enterprise Content Management

Enterprise Content Management (ECM) provides secure, mobile, and anytime access across all content stores and includes Cognitive Search capabilities, Content Access for All Users through all digital platforms such Phablets and Web. It manages content from multiple sources without having to migrate content and provides management features that support simple or complex document and publication requirements.

Digital Experience DX Solutions

The digital experience platform is an integrated, centralized enterprise software framework intended to provide a unified customer experience across most digital touchpoints. The DXP is essentially the core set of software technologies that enables the creation, delivery and optimization of personalized, content-rich digital experiences in order to engage customers and drive them to a desired action.

Application and Data Integration

Modernize Agile Enterprise hybrid Application and Data Integration by defining reusable and managed APIs, develops modern integration flows that can be deployed inside microservice, or addresses the data pipeline at scale with a high-throughput, low-latency messaging platform.

Advaced BI Analytics

ITS uses its Advanced Analytics, Data Sciences, and Data Mining paradigm to enable businesses to Design, Develop & build, Deploy & implement, Discover & analyze the process and enterprise data, and Deliver value to mitigate risk and optimize existing resources. The company uses its flexible engagement models to suit the business requirements and its dedicated AI/ML innovation center to deliver cost efficient solutions.
